

HEART FAILURE ASSOCIATION OF INDIA

IN ASSOCIATION WITH

HEART FAILURE ASSOCIATION OF THE ESC

announces its

4th Annual Congress on Heart Failure

At

J W Marriott, Mumbai
24th & 25th Feb 2018

HEART FAILURE ASSOCIATION OF INDIA

WELCOME

Warm welcome to the Heart Failure Association of India 2018 meeting which will be held jointly with the Heart Failure Association of Europe at the exquisite venue of J W Marriott, Mumbai from February 24-25. As you will notice in the program brief, we have incorporated a comprehensive review on heart failure – from bedside to bench, so that the clinical science of Heart Failure is discussed in details. The scientific meeting will have accreditation from the Medical council.

Amongst the galaxy of faculty, we will have the pleasure to interact with Professor Stefan Anker, Professor Inder Anand, Professor Wolfram Doehner and Professor Jeanette Schulz-Menger.

Heart Failure has evolved into a science which requires involvement of Nursing care, Clinical expertise and Physicians outpatient care, Hospital team approach comprising of Cardiologist, Critical Care Specialist, Nephrologist, Electrophysiologist and Cardiac Surgeons. This concept is getting stronger by the day in India and has led to effective patient - oriented cardiac rehabilitation.

We believe that the scientific meeting targeted at Heart Failure will have to merge the wisdom of faculties from India, Europe and the Delegates and we urge you to keep it interactive.

Warm Regards and Thanks

Dr. Uday M. Jadhav
Organizing Chairman

Dr. V. K. Chopra

DEBATES

DRUGS IN HEART FAILURE – HORSES FOR THE COURSE

Beta Blockers in AF and HF – Time to Move On

Beta Blockers in AF and HF– Don't Bury them as yet

Chairperson : My Conclusions- Finding the sweet spot

ACE Inhibitors – Phase them out

ACE Inhibitors – Benefits Robust

Chairperson : My Conclusions- Finding the sweet spot

MRA's – Potential Limitations for dose benefits

MRA's – Use them early; very early

Chairperson : My Conclusions- Finding the sweet spot

DRUGS IN HEART FAILURE – HAVING A RELOOK

Ivabradine – Lowering HR with Beta blockers optimization is enough

Ivabradine – Beta Blockers or No beta blockers, Ivabradine is must

Chairperson : My Conclusions- Finding the sweet spot

Tolvaptan - No more studies please, no benefits

Tolvaptan – Only option for low sodium, identify the non-responders

Chairperson : My Conclusions- Finding the sweet spot

Hydrallazine- Isosorbide Nitrate – No substantial benefit

Hydrallazine- Isosorbide Nitrate – Option for HF with Renal Dysfunction

Chairperson : My Conclusions- Finding the sweet spot

Amiodarone – No benefits, potential harm

Amiodarone – What else to treat arrhythmias

Chairperson : My Conclusions- Finding the sweet spot

Digoxin – Change old thoughts, not even a reserve drug

Digoxin- Old man has still something to offer

Chairperson : My Conclusions- Finding the sweet spot
